

Anti-Static Wrist Strap – Instructions for use

IMPORTANT: PLEASE READ THESE INSTRUCTIONS BEFORE USE!

SAFETY NOTE: When using the Anti-Static wrist strap, for effective grounding, you should leave the mains cable connected to both the equipment you are working on and the mains wall outlet. However, to prevent the risk of electric shock **YOU MUST SWITCH THE MAINS POWER OFF** at the wall socket!!

1. Leave the mains cable connected to the equipment and the wall outlet, but **SWITCH OFF THE MAINS SOCKET!**

2. Place the wrist strap on your wrist. Adjust to ensure a tight but comfortable fit.

3. Attach the crocodile clip to an unpainted metal part of the equipment's chassis.
